Indicator Light Status Description

1

① After the device is powered on:

Status Light

The red and blue indicators flash alternately: ready state, currently available to be added and bound by the APP.

Red Flashing

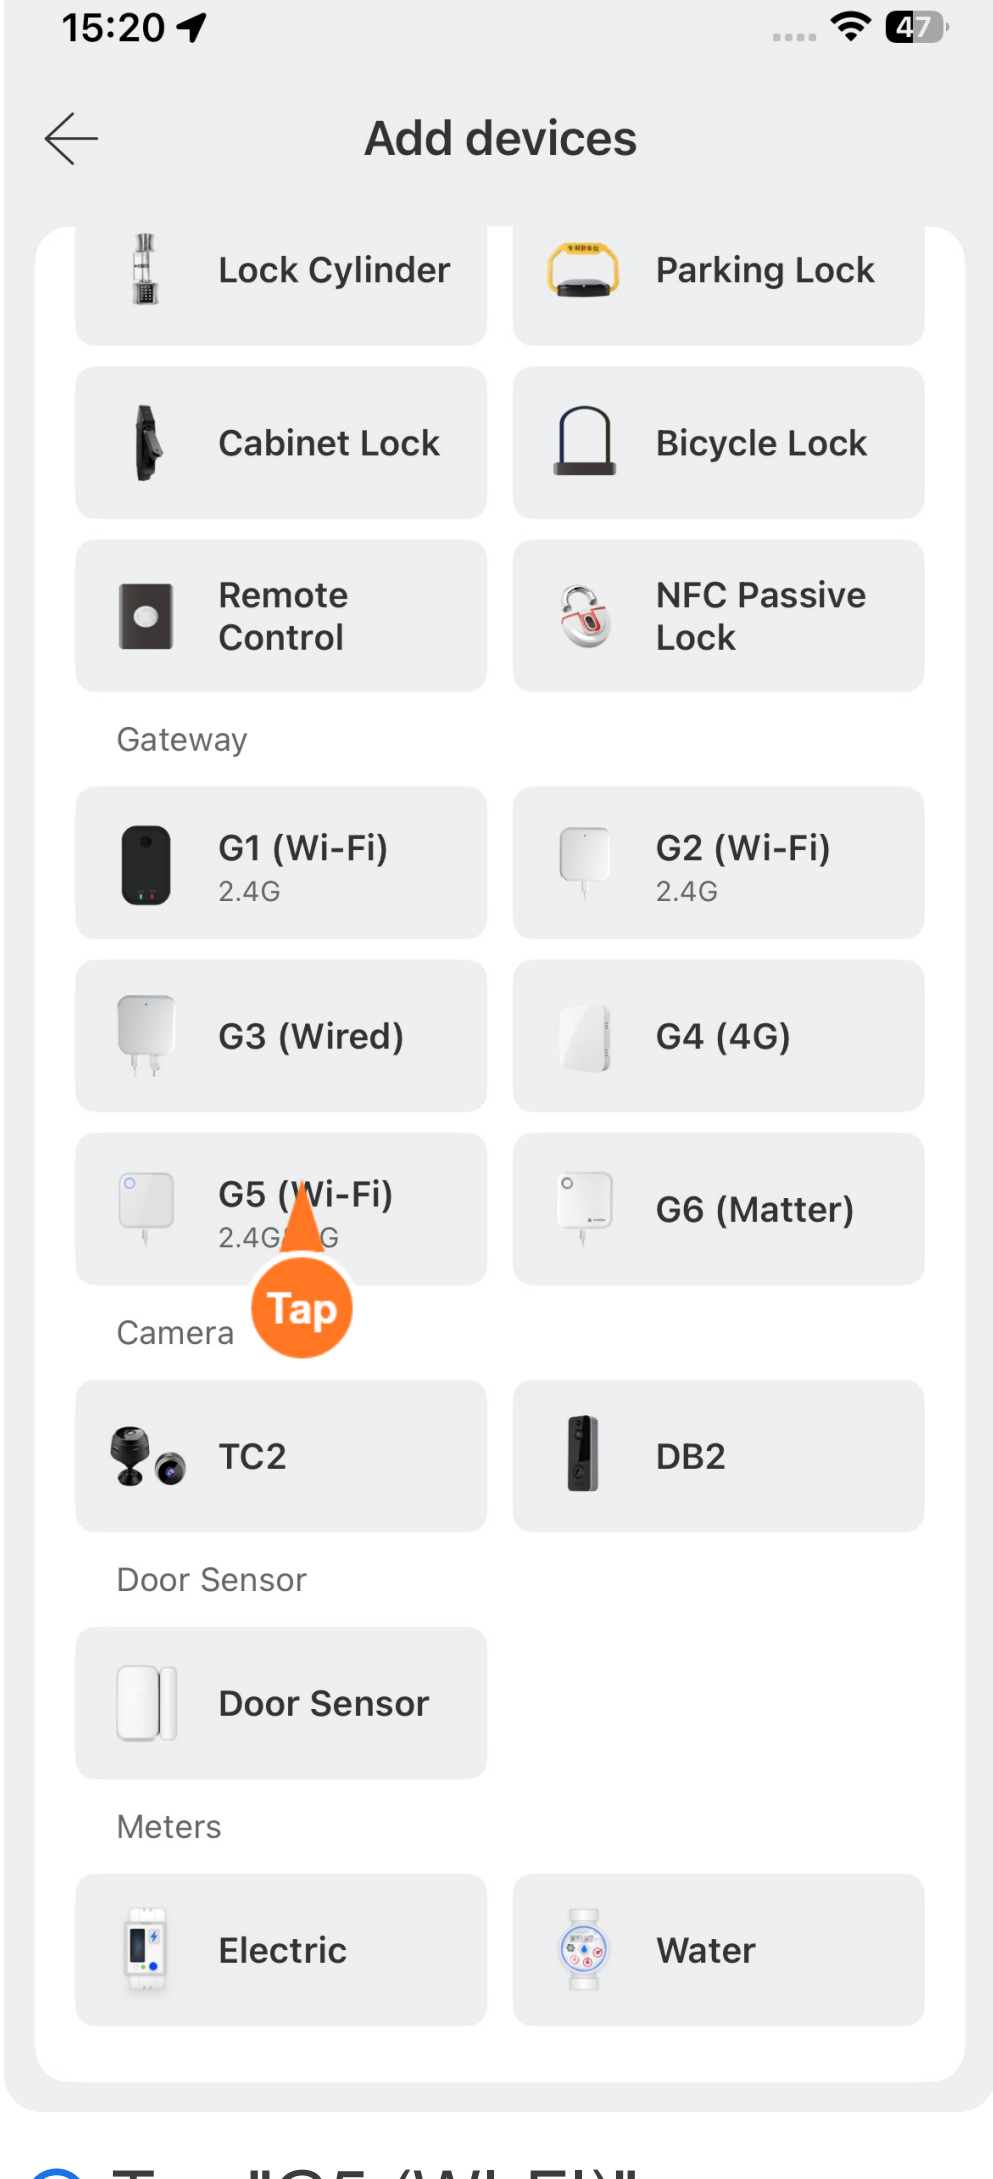

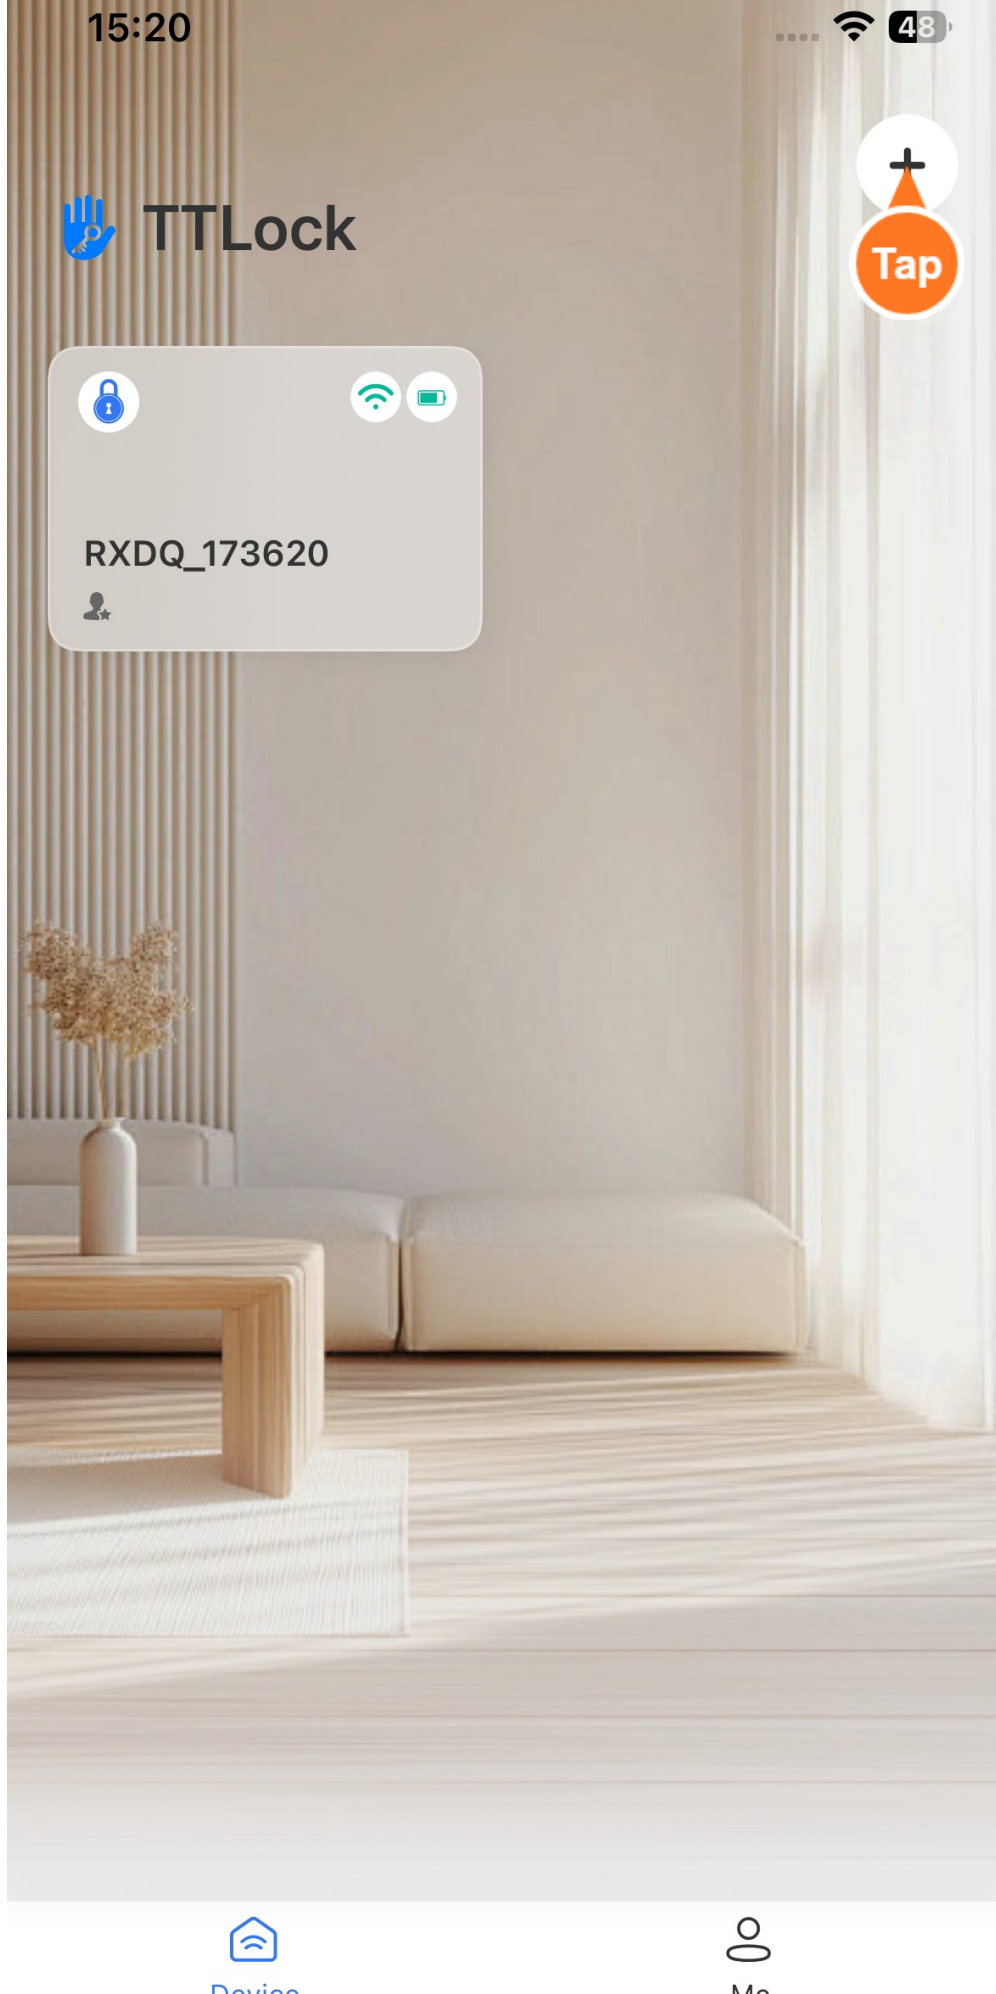

Poor network connection, unable to communicate with the server.

Blue Flashing

Indicates normal working state, cannot be bound.

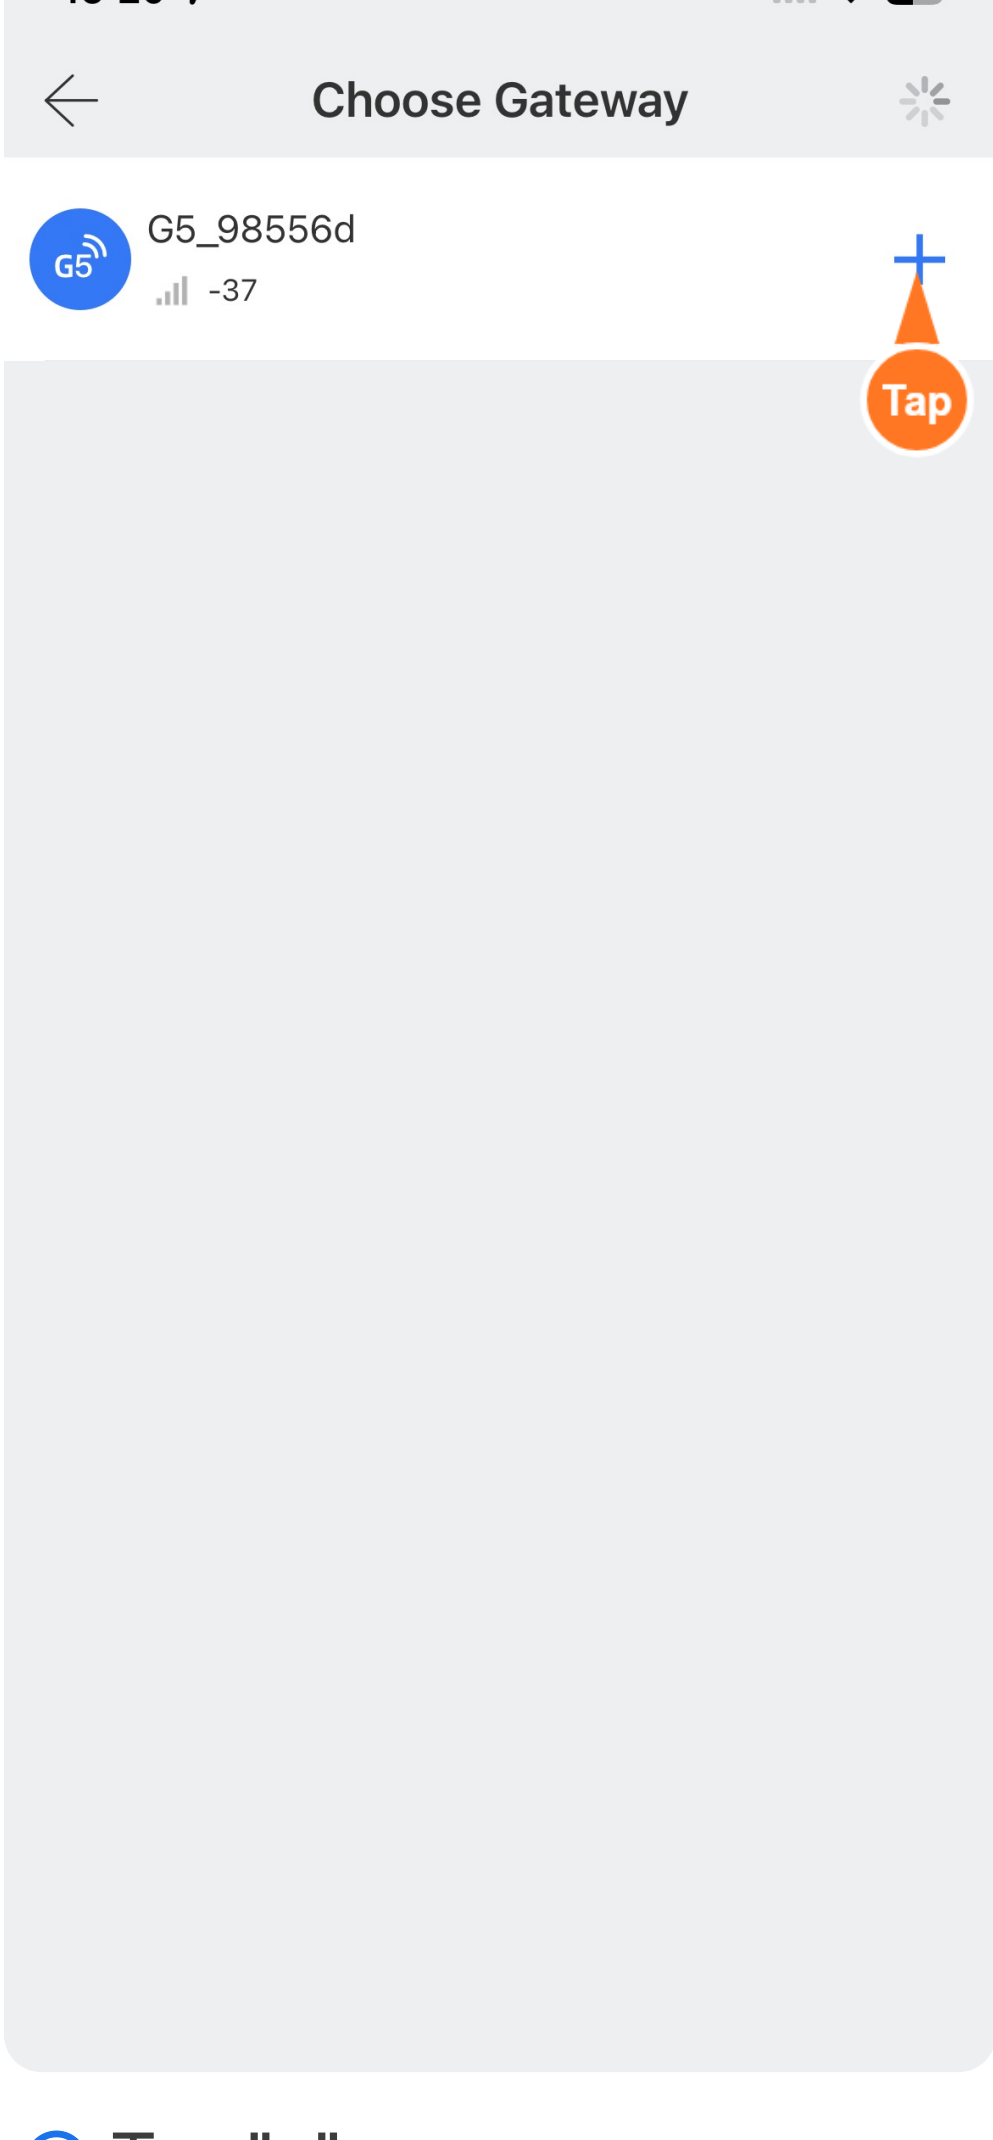

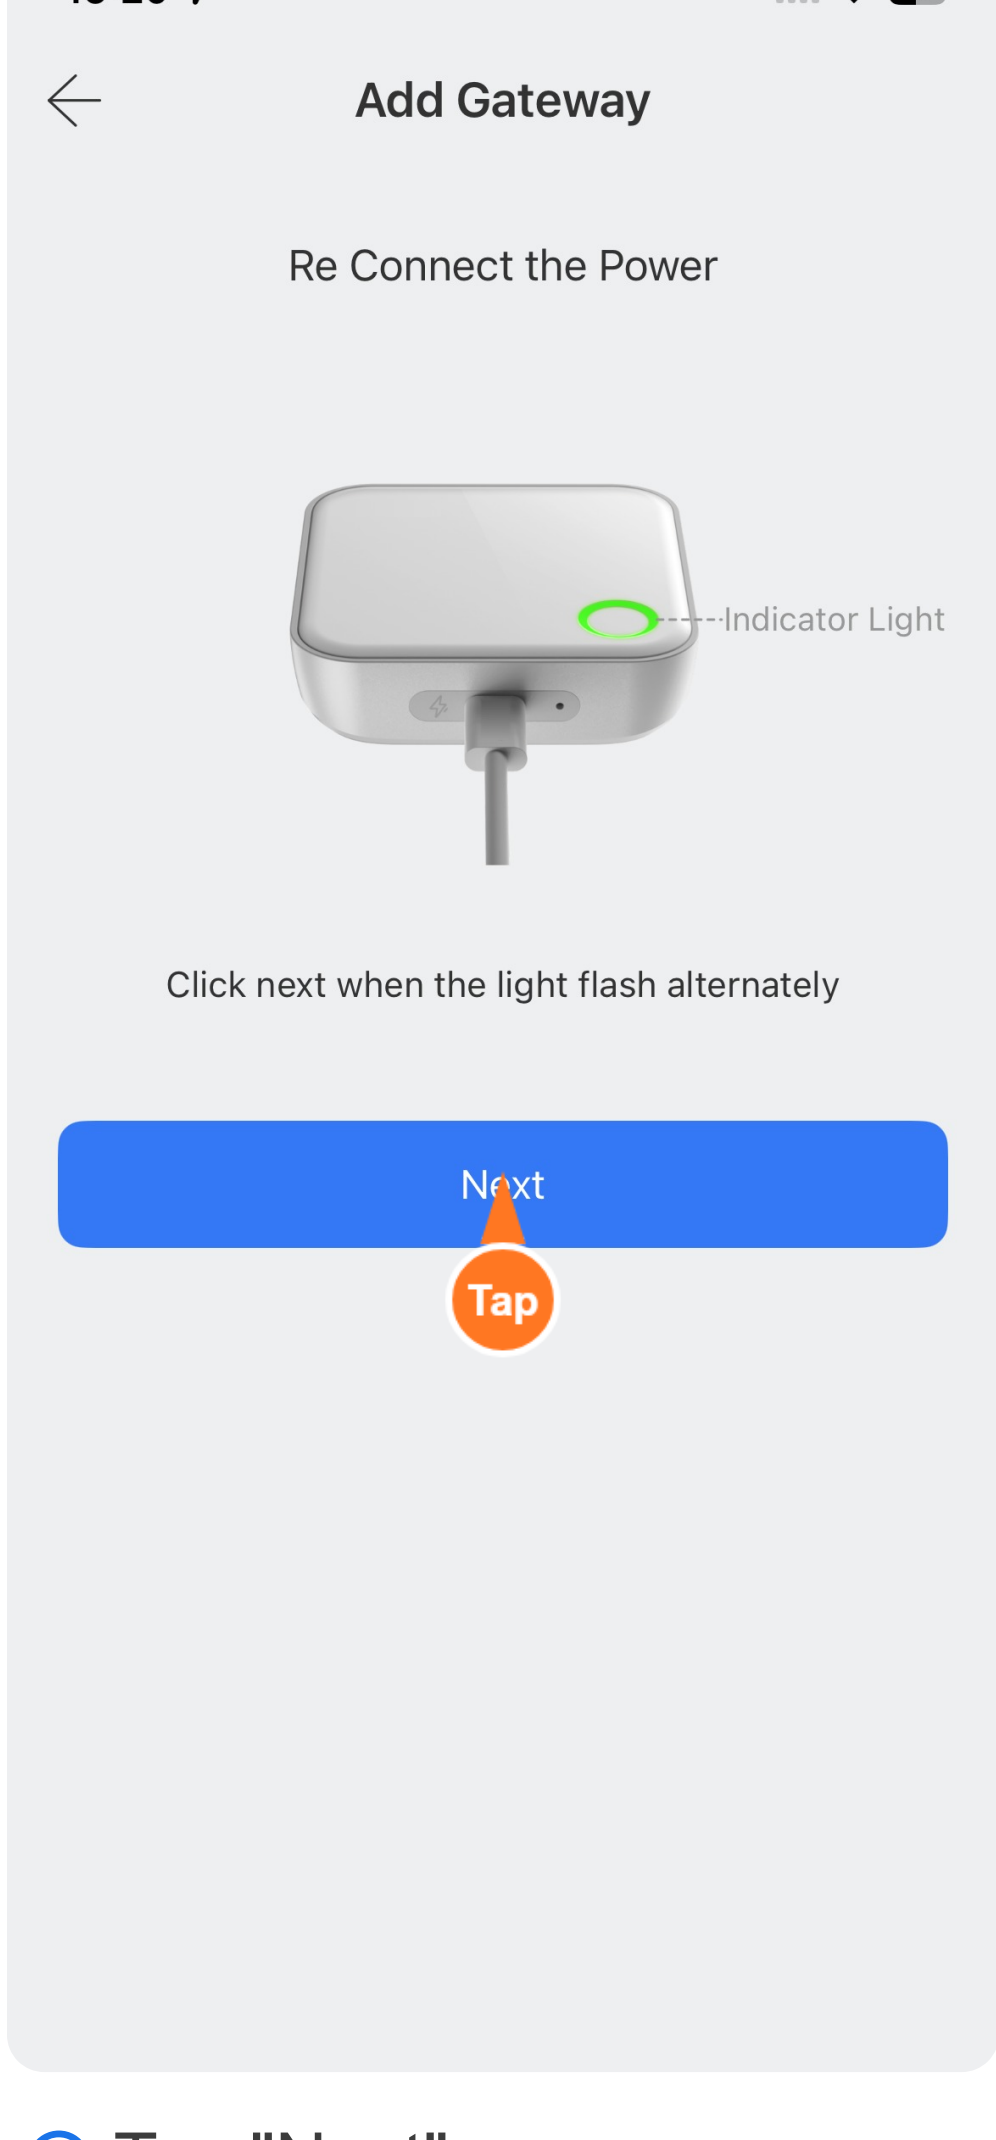

Gateway Binding to APP

- ① Connect the gateway to the power supply and open the "TT Lock" APP.
- ② Tap "+".
- ③ Tap "G5 (WI-FI)".
- ④ The gateway indicator flashes red and blue alternately, tap "Next".
- ⑤ The G5 device is displayed, tap "+".
- ⑥ Tap "WiFi Name" to select an available WiFi, enter the WiFi password, enter the Gateway Name, then tap "OK".
(Note: 2.4GHz or 5GHz WiFi can be used)
- ⑦ The gateway automatically searches for the devices already bound to the APP and connects to them.

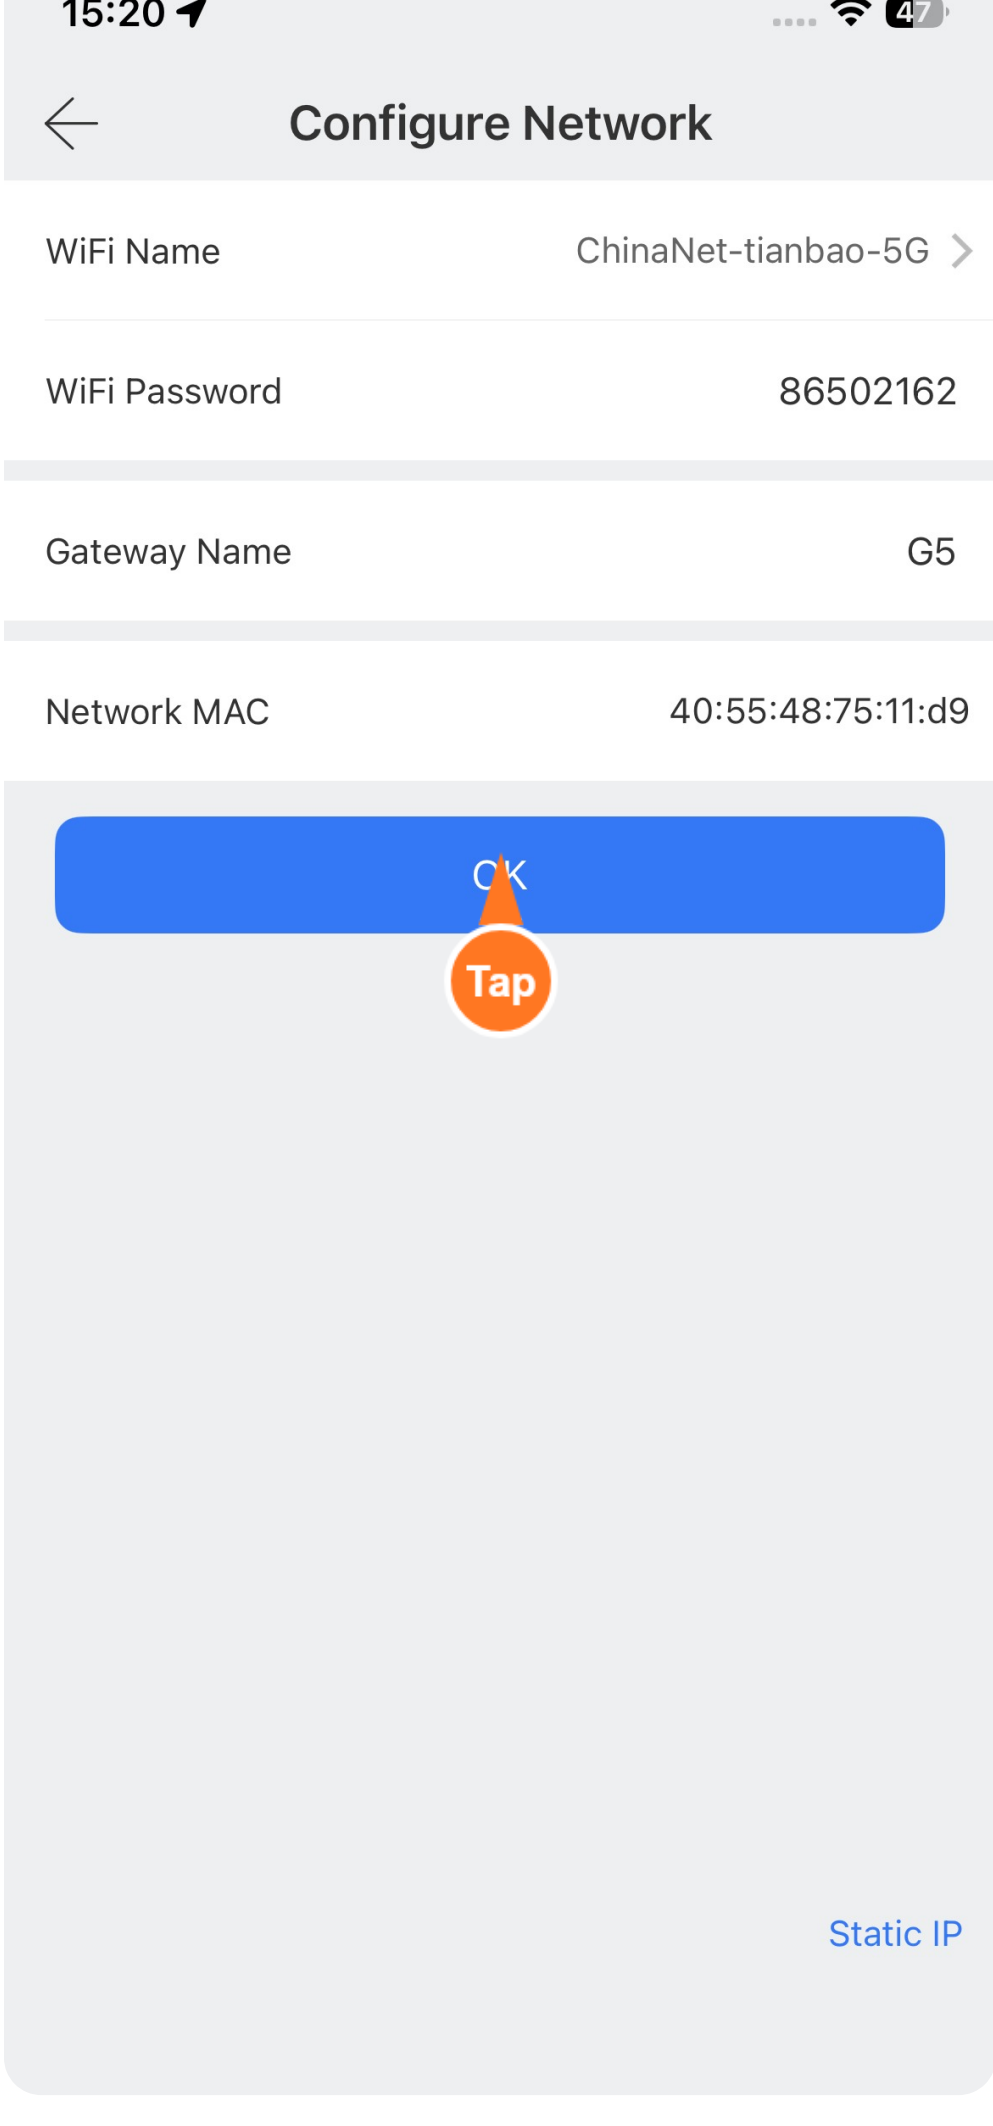

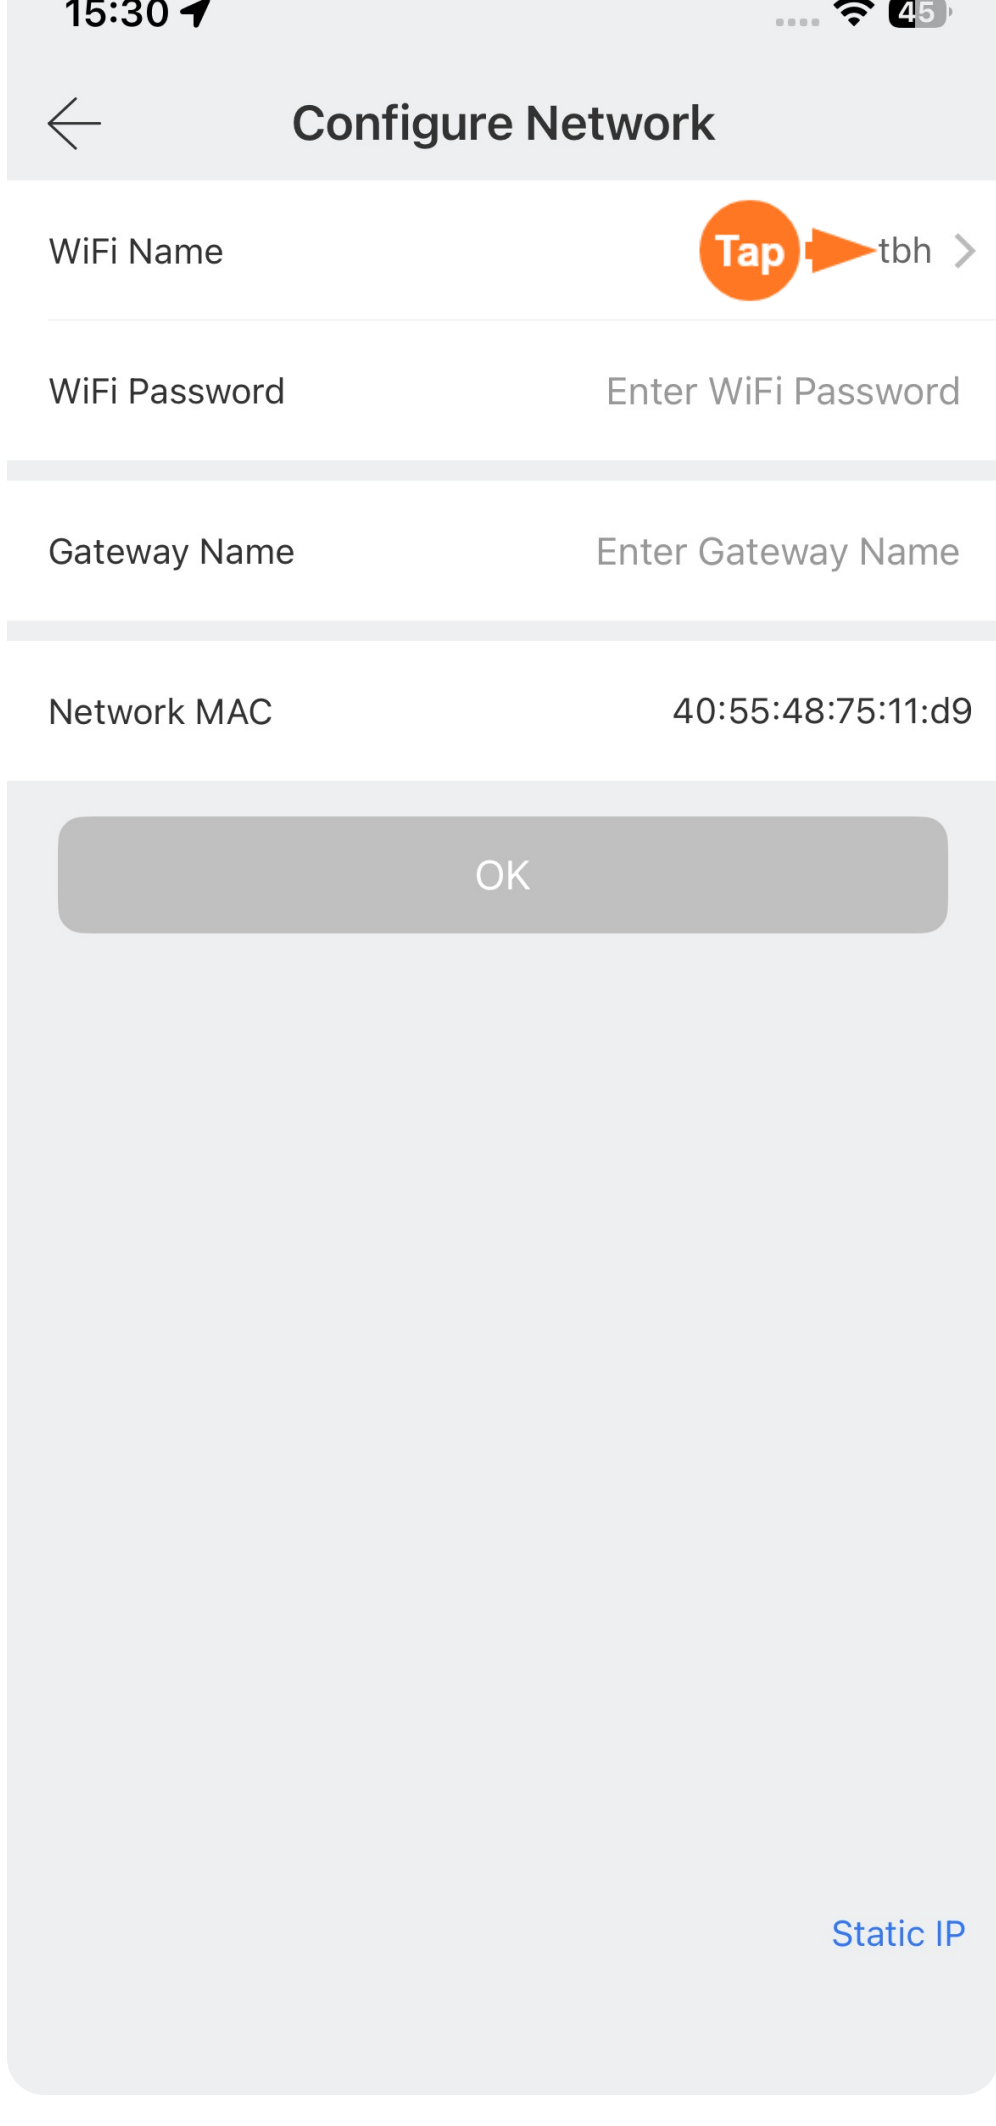

② Tap "+".

③ Tap "G5 (WI-FI)".

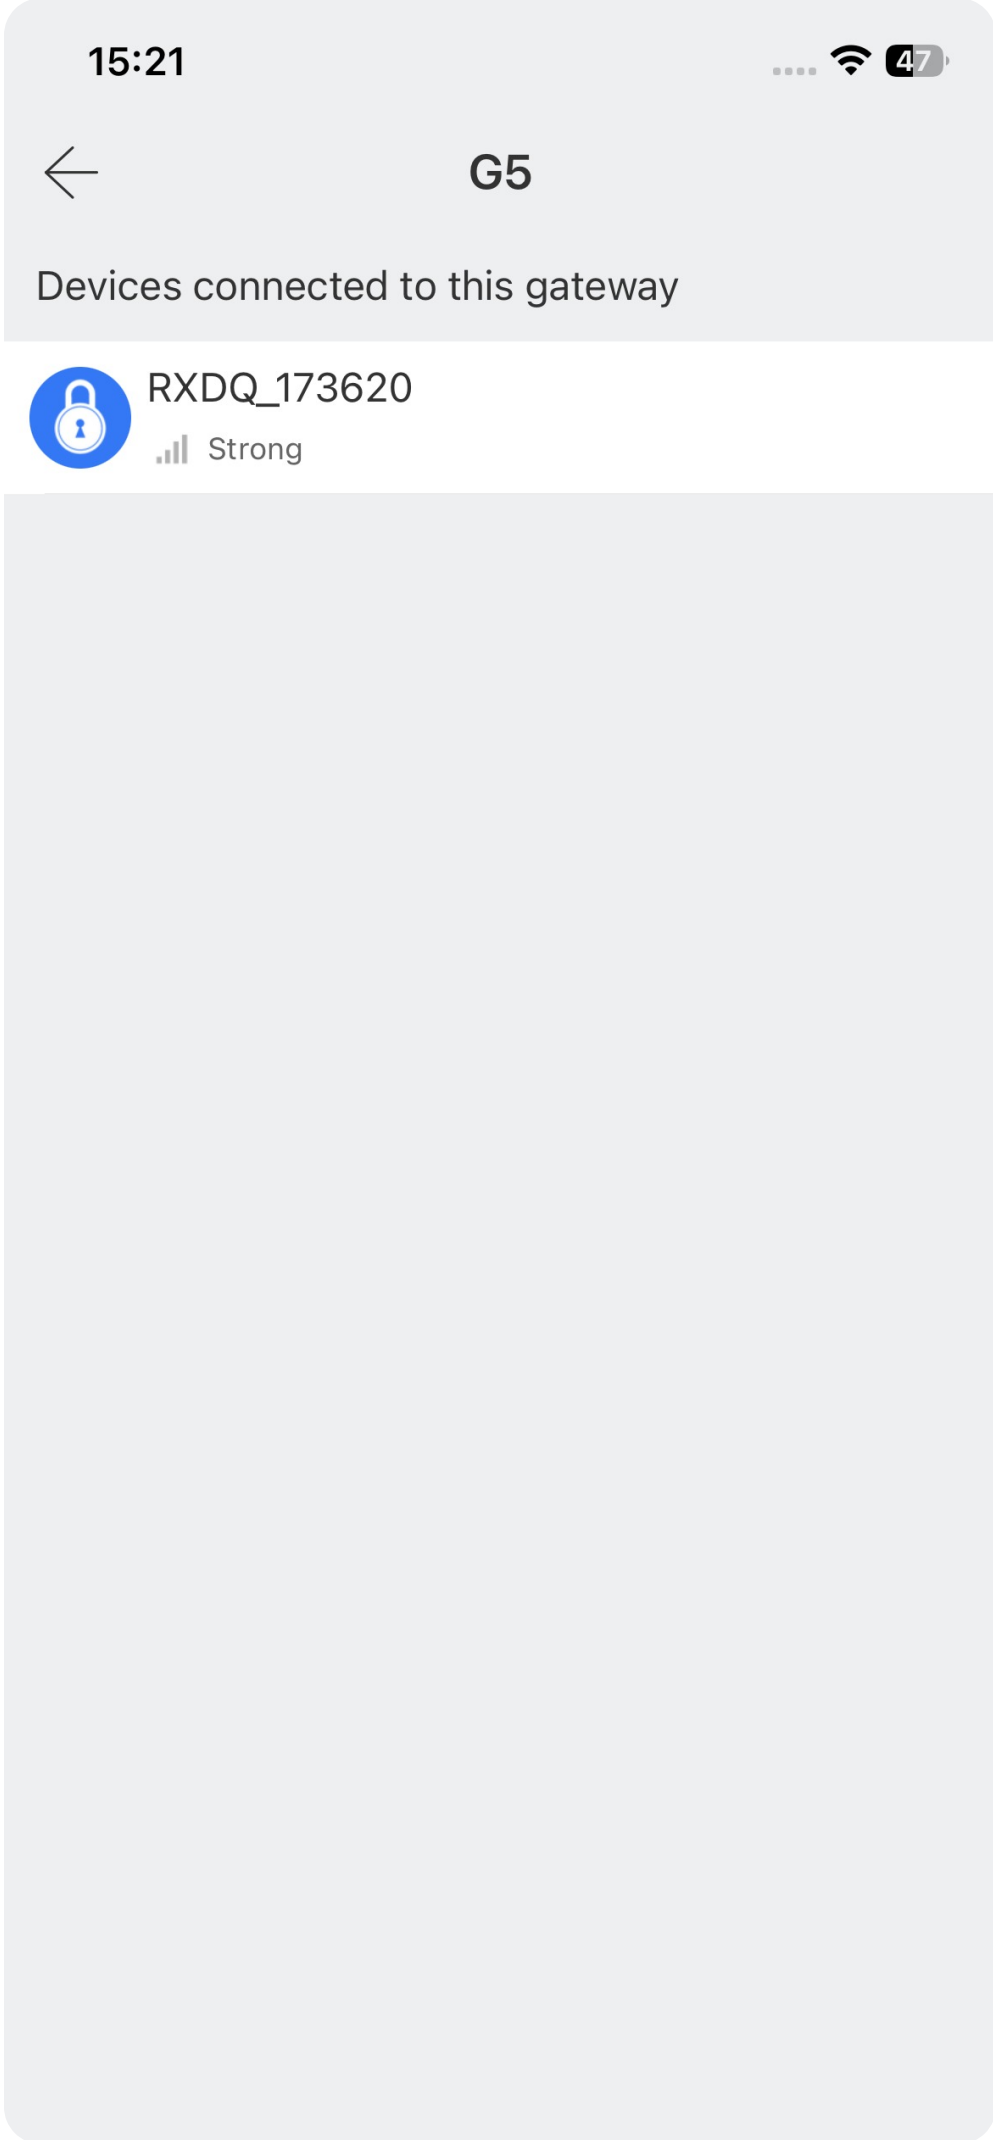

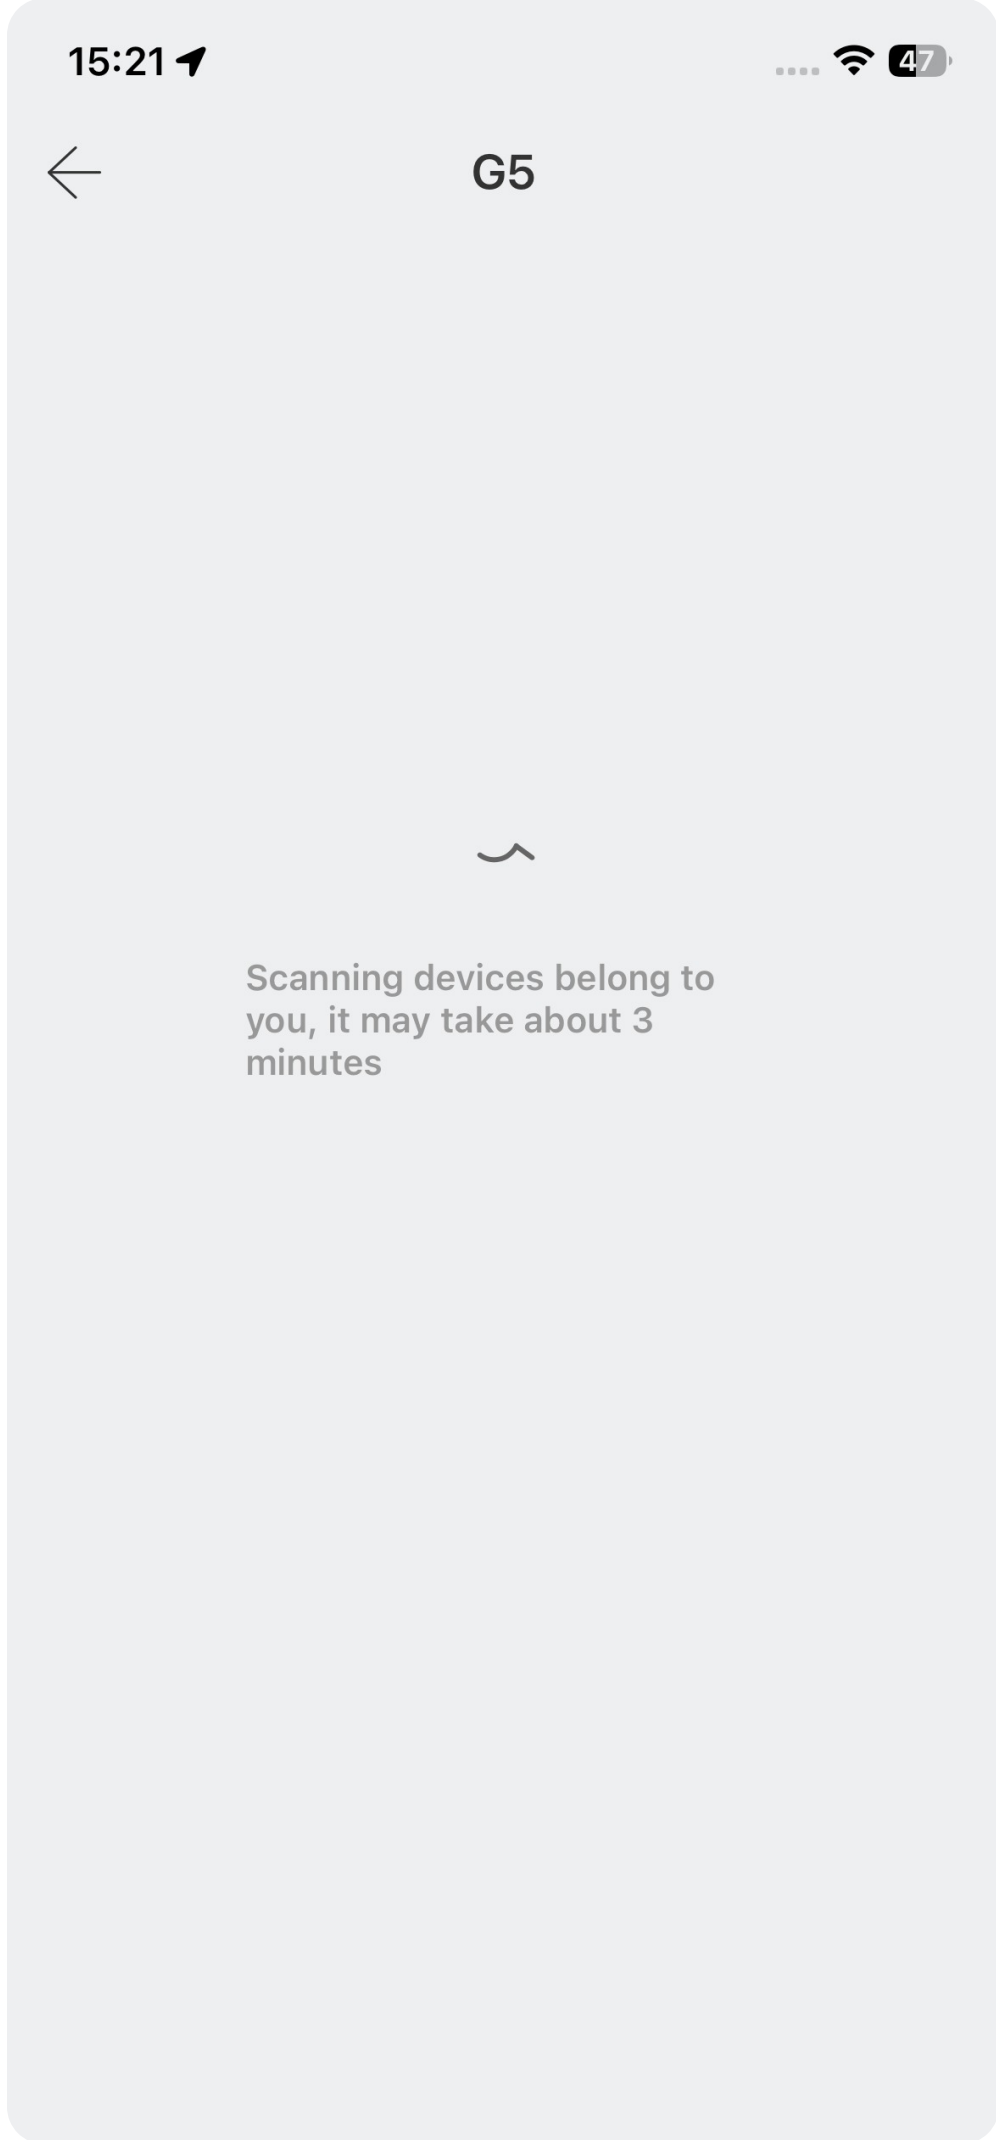

④ Tap "Next".

⑤ Tap "+".

⑥ Select a WiFi, enter the password, then tap "OK".

⑥ The OK button is enabled after entering the password.

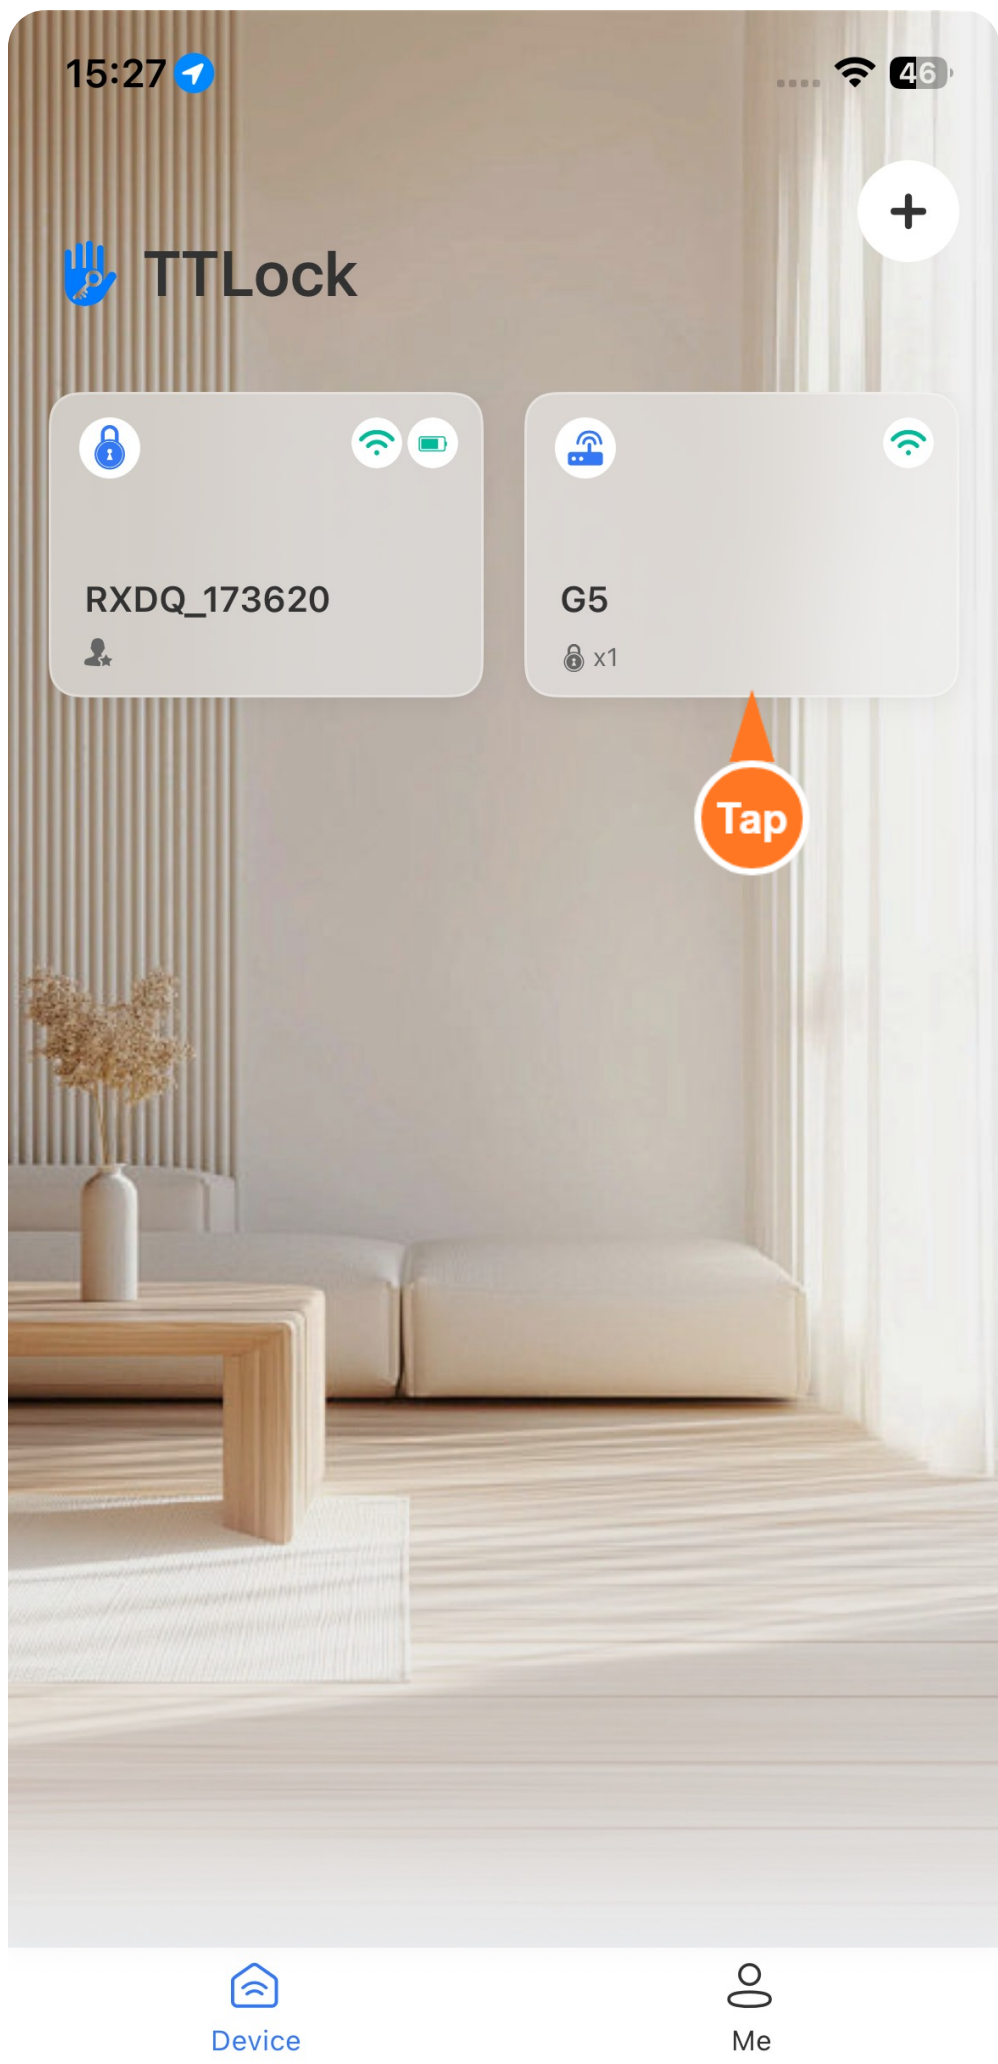

⑦ Scanning devices belong to you.

⑦ Devices connected to this gateway.

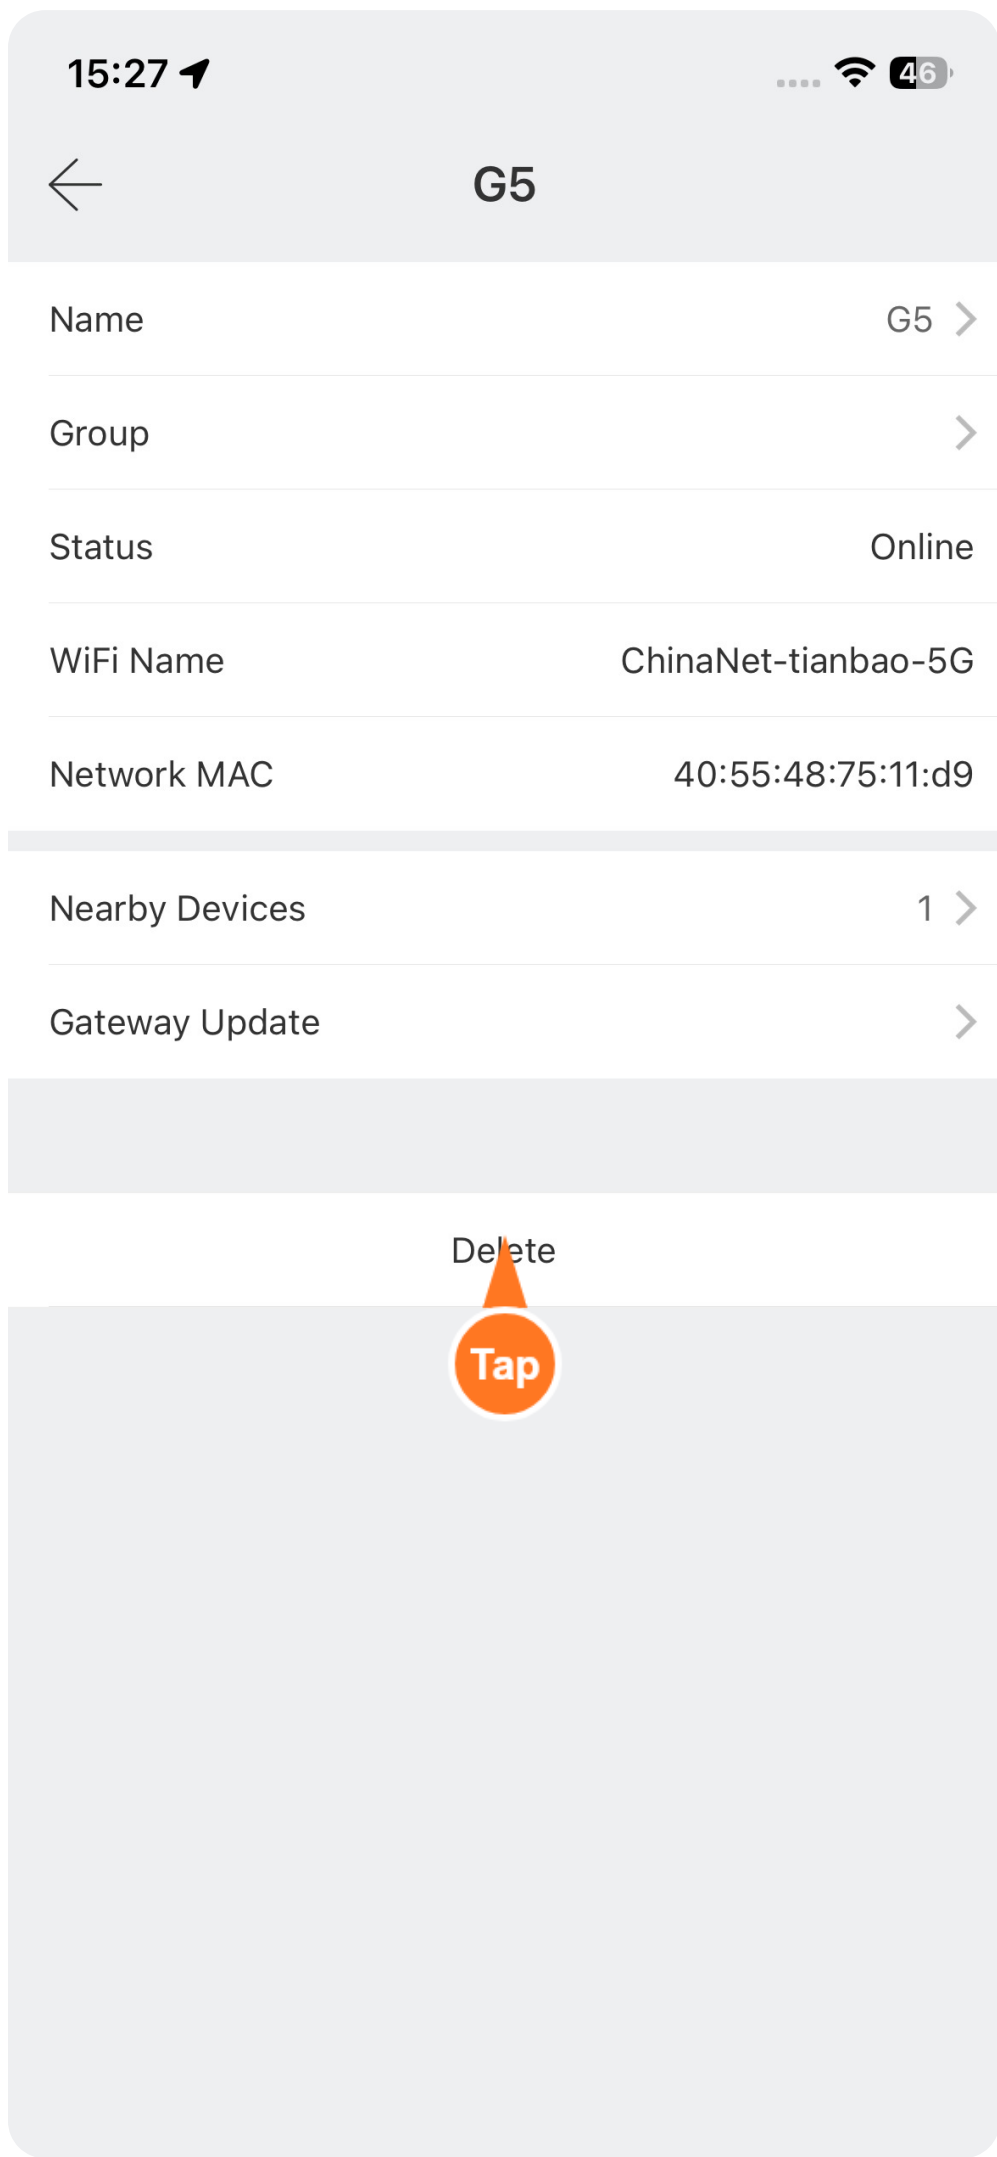

Delete Gateway

3

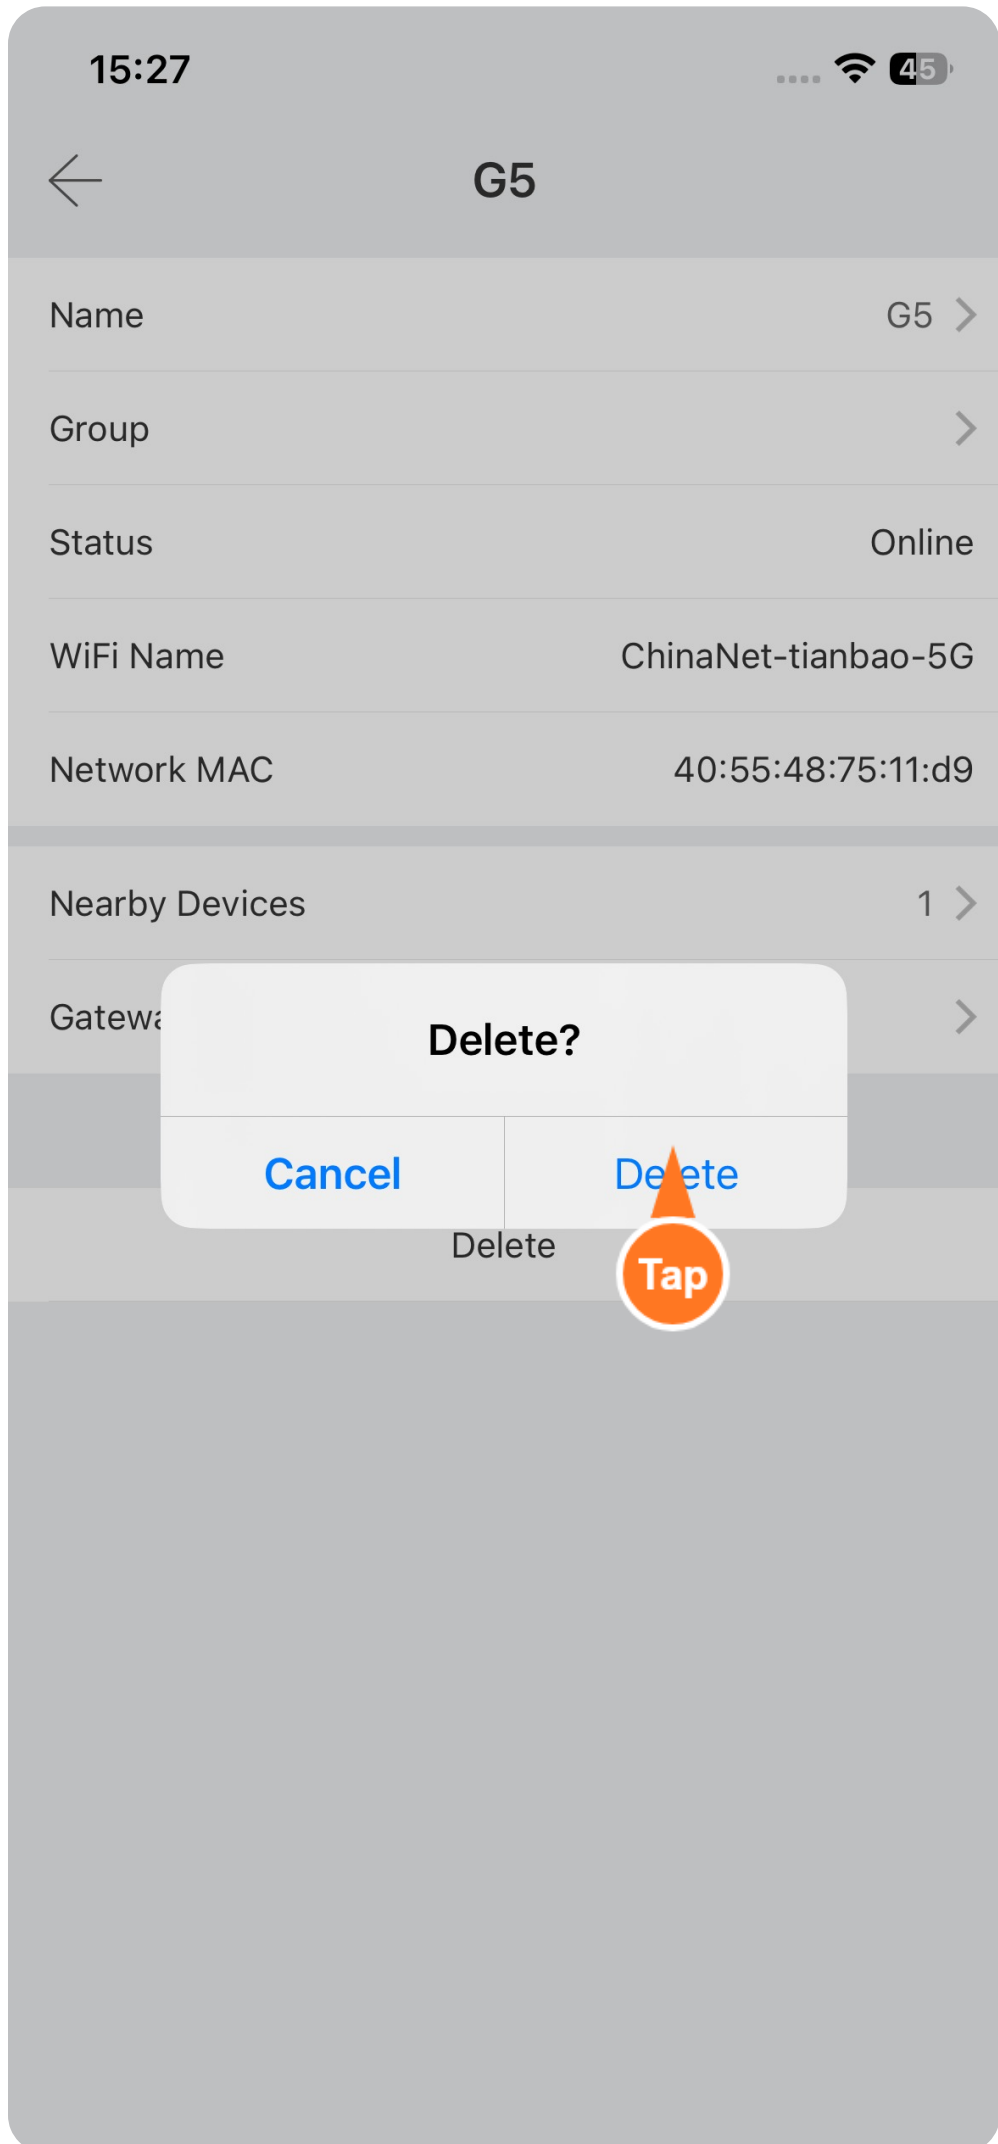

- ① Select the gateway to be deleted.
- ② Tap **"Delete"**.
- ③ Confirm the deletion.

① Select the gateway.

② Tap "Delete".

③ Confirm the deletion.
